

# We the Pleiadians

Such a wonderful joy to know that other worlds exist, and these worlds are a miracle. Who knows about other beings existing on the same level of consciousness as us, humans? Very few people are aware that we humans are not alone. It is so amazing that the world of wonder is here for us, for humans. The magic exists for all of us, in any dimension, just make it happen.

I am feeling so blessed to connect with our brothers and sisters who are our divine legacy. I am more than overwhelmed when it comes to connect with such beautiful beings, that are part of our planet, the soul of our Gaia. Seemingly, it's awkward to speak so openly about our legacy with the most unrevealed beings. They are the Pleiadians. They are the armour of our planet. They are.

*So, no more tabu, just open your mind, my darling reader, and embark on my boat of wisdom, I will sail it as best I can.*

Oh, I am so exiting to share all the experiences I had and will come along during my writing of this book. The daylight of this book is extremely important for humanity, I will try with all my heart to make it happen. No more hiding the truth about a lot of people, humans, that are experiencing spiritual connection with our neighbours, who are the Pleiadians. Such a blessing and honour to be chosen for such kind of work I must do and embroider a wonderful book that will make a quite significant impact on human evolution. Happy to be part of this project and thankful for what will come along.

Fingers crossed for humanity to receive the identity of who they really are, to embark on a new knowledge of self-understanding, to accept the challenges that are near to come, to create their happiness, to speak their truth and so on, the list is long enough to undertake action and be aware of who we are as human beings.

We live on a wonderful planet – is a statement of who we really are, we are a beautiful population who have inhabited for ages, and nothing can destroy the divine connection we have with the Creator. Seemingly, the world is not what we all expect to be. Sometimes the night is longer than the day, but we must thrive, blink, and spark instead of letting ourselves fall into the darkest and deepest sleep. The chaos is huge nowadays that can be an opportunity where we can stand for our goals, and our hopes, and be better and better every day.

*No more complaining about bitterness and cruelty that surrounds us, no more tears and pity, is time to acknowledge our identity as humans and wake up from the darkest dream we are. How hopeless it is to see a bunch of people who govern our lives, destroy our dreams, and what is more painful, steal our happiness.*

It is time to speak our truth and be loud, enough loud to awake all the humans from this planet and to see the light of the day. No comments on how it works to do so, the divine power can do this and more. The only thing I can comment

on is that out there is an entire army which is designed especially for this reason, to awaken humanity no matter what.

I am pleased to be your companion, your light, and your guardian in this huge process that you decided to have a look at and see what happen if you try to be open-minded and consider other option of self-awareness and self-discovery. Now, in this moment, you are giving yourself a chance to embrace the divine power and connect with your higher self. I am so glad that you are reading these pages, which are a bridge that connects your soul with the Creator.

Sometimes it is difficult to achieve whatever you want in your life, but sometimes it is just a click and what you want, or desire is manifesting in your reality. You think that it happened because is a coincidence or you are lucky. The coincidence is a magic moment of what your soul is experiencing at that moment, making the connection between what you desire and the inner Universe. Yes, the inner Universe. How crazy is that? I know. The best magic moments are nearly to come in your life if you can make this connection consciously. This is so wonderful when you feel and understand how the Universe works, it's your Aladdin forever.

The army that is present in our life, the divine army that I mentioned before, is the legacy between us the humans and the Creator, the Universe. The Pleiadians are beings that have been with us from the beginning of our creation, they inhabit a fourth and fifth dimension, and if we are speaking about dimension, the humans are in the second one of the inner worlds.

The connection between a human and a Pleiadian is possible through spiritual awareness. Our consciousness is the transport that makes it possible for us to be in any place we desire or connect with any being, doesn't matter in which dimension they are, time doesn't exist. It's so cool!

*No time - means the infinite of being alive in the Present. That's why being in the present is so important. What you are today is forever and the present you will be tomorrow will be a better version of you, and so on. We are in a constant evolution of our present that makes us humans nowadays.*

It is hilarious but I am learning too during my writing, I am in a deep connection with my soul that opens the doors to universal wisdom. I have been pleasantly surprised so many times about how wise and powerful my soul is in comparison with me as a body and mind. I finally feel both parts of me, the one that is my soul and the one that is my body. And, at the same time, the connection between them. What I am explaining is nothing of another world, we all humans are the same, I invite you to discover yourself, and how your body works in connection with your soul.

Self-awareness is important to open the doors to other dimensions, which are the best places where humans can discover who we are, where we come from and where we are going. It is a new world of wonder if you submerge yourself in this new adventure, that is self-discovering. It is important to understand first where we are coming from, and how our souls get to this planet.

The divine source is the central star of all Universes, our Creator, our God, you can name it how you want. The divine source is made of what our souls are. The soul is a powerful light, energy that vibrates in love, the unconditional one. The consciousness is our soul's body. I am not speaking about the human body, the physical one. I am referring to the soul's body which is the consciousness.

And so on, the human body is the sacred sanctuary where our soul resides, especially in our hearts. That's why we constantly are saying - listen to your heart, the answer is there. When you, as a human, are aware of who you are and not just thinking about your physical body, you experience contact with the inner Universe. Understanding where we are coming from, on this planet, is indispensable for our growth and evolution. I am trying to explain this as simple as possible for everyone to understand.

*The God, the power we all want to connect with, is so awesome, but we forget that we are part of it. If you want to have the legacy between you and God, is through your soul, your heart. Do not look for it outside of you, in a place that is far away from you. You must know that God is inside of you.*

The space is the home of all our Universes. And we are the dots that are interconnected with the divine source. The space is vast and infinite, as we are the souls. To understand the meaning of no space and time, this example helps to see the big picture. We are not alone. The life is infinite out there in the space, and we, as humans, are part of it. How wonderful sound these

concepts! Take a deep breath and close your eyes, in silence you can find yourself, as a divine being. Just try it, just do it!

My darling reader, nothing is more grateful than to be in contact with your soul. Ask all the questions you have - about everything you need to know, and the answers are there. Just be patient with you, with your own process of connecting with your soul. Sometimes it's not easy, the veil is too thick on your eyes. The desire of it to happen will bring you where you want. Be prepared to be surprised by the magic of our soul, our inner Universe.

*The constant meaning of being alone is a true fact we experience daily. We never are alone. Be aware of how vast our space is, the Cosmos, to understand how wide life beyond our world is, our planet. A tiny, thin part of space is our Planet Gaia, the rest of it is the outer Universe and Universes, full of life.*

How hilarious sounds this. Open your mind and embark on a new adventure that will bring you joy, happiness and self-growth. So sabbatical are the Universes, they are all around us, in concordance with our soul. They are the soul of the Cosmos, all together we are the Creator.

Accordingly, in ancient civilizations, the Earth has been habited by aliens. Nowadays is already not a tabu, many documentaries are showing what the experts are discovering about our ancient Earth. It is astonishing just thinking about this option that can be real. So, the topic about aliens is, sure, a kind of tale for you. What I want to bring here is that we are not alone in this vast and wonderful Cosmos we live.

The Cosmos always was for me a wander, what is there, out of our planet, who or what are the stars, they are so beautiful placed in our dark sky during the night. And so on, a lot of questions and nobody to answer them. But my desire to discover all the truth about why I am on this planet, where I came from and where I will be after my death, was my first step in my self-discovery. If you ask for answers, be sure you will have them. Just be patient.

Now is the time to bring more information about the lovely beings that I discovered they exist and surprisingly they are here for us, for humanity, to help us to heal our souls and to be able to see the divine side of us, as humans.

*It's sound out of this world because they are out of this world. They interact with us through our consciousness. They are the Pleiadians.*

There are already a lot of books about these beings, and it is not any more news that they exist. I am here, in this present of the Earth, of my life, to speak the truth about my experience with these undeniable beings. For many years I was been trying to understand who I am. I was pretty sure that it was not just about my body, it was about something more profound.

My journey was full of dark moments. I was struggling a lot with the experiences I had, and I couldn't tell anybody of my kin. I didn't fit in this world, everything was so awkward for me - the school, the education, how society works. I just was hanging on a tiny stream of my loving family that helped me to go on. Nature was my ally and continues to be a strong side of me, that I always appreciate when I have my downs.

We embrace an unexplainable feeling when we are surrounded by nature. What we learned in school is that nature is our source of living, as food, oxygen and so on, and how it is correlated with the Sun, but not about how we are part of it. With this concept in mind, we separate ourselves from nature, as somebody superior, who just has it in his power.

What I discovered is that it's not true, this concept made me confused, but thirsty to explore more. Why is the education system made so rough? Why we are so deep asleep? I made my personal conclusion that something or somebody doesn't interest that we, the people, know the truth about anything. Everything is twisted and curved in such an intelligent manner that nobody ever questions about.

We spend a good part of our lives in school, where are supposed to learn about our planet and our correlation with it. Instead, we learn history full of lies, math theories and science, which is okay but not enough to show and introduce us, the kids, to the Creator.

*So true is that we are in a deep sleep and to awake us, the humans, we need help, we need guidance, we need the Pleadians. Nobody can imagine how wonderful being they are, they are our guardians, our future, our soul.*

Where do the Pleadians reside? The fourth and fifth dimensions are their homes, their consciousness is higher than humans, but still can be in contact with us through our senses. Not long ago, I discovered I am a medium, having this blessing gift I realized I can contact them and have a normal conversation.

I have always been in contact with them but never understood who they were until not long ago. Nobody tells you about such things in school, or in family, or religion.

Why is so hided, and not normal to contact other beings that are not humans? I had to find out by myself that what happened to me is normal, and is true, and more people experience the same. I have been driven to self-discovering, having my spiritual teachers, one of them was my mum's friend and neighbour, and the others were from social media.

*God bless the internet, it did its part in my awakening, and I have to say that everything has a dark and a light side, depending on which one you choose. What I am saying is, that through the internet, people choose how to use it, for bad or good reason, as everything in this life.*

Also, the Pleadians, reside between us, the humans. I was surprised when they told me once that they live between us, in a physical body. And these are the dolphins. The dolphins are animals with a higher consciousness than humans, and they are reincarnating on our planet to raise our vibration as a whole. They are pure love. They are the Pleadians.

How wonderful it is to discover these beings, their existence and how they help humanity to raise their vibrational state, and the planet one. Their spaceships, in a physical form, are designed specifically to restore human bodies, to clean our DNA. We are so contaminated by thousands of years of dark and misleading. They work hard to restart the divine cells of our physical body and

make us aware of who we are as divine beings. The dark works day and night to hide the truth from us, but the light workers, as Pleadians, work even more to awaken humanity.

Why is so important for us, humans, to find out who we are? As a whole, and as a planet, we have our way of evolution. That's why is important to understand what we are made of. We are made of intelligent crystals, that lead to our consciousness a vibrational field. We are the humans. Nor can the darkest side of us cope or stand to our free will of being sovereigns and free of slavery. So powerful is our soul, so intelligent is our body, conquering the Universe.

I am pleased to be part of this journey of awakening through which humanity goes. We all are blessed and empowered to be here, in this present of our planet.

*So nasty as so true is, that you as a reader can have your thoughts, it's fear enough, but think about how to spread the words of our Creator. He resides inside of us and outside, as everything that surrounds us, we have a deep connection with the Creator. This means, that the information we have is one and we access it by connecting with our soul.*

Try to find the way to your soul and see by yourself if any of these words I am writing in this book are true. How can I awaken your desire for self-discovery? At least be patient and open-minded.

Our goal is to get to the same point, to connect with our soul and the Creator. No more dreaming that the outside world is the only reality you have. Dream bigger and wider and you'll see how magic is everything around us. We are.

Come along, bring your thoughts, and put them on the table, for everybody to access them. I know there are a lot of people experiencing the same, just need to be invited to share with all of us. For a long time, I thought I was the black sheep of the crowd and whatever I experienced out of normal, what we name normal, was not for sharing. Afraid not to be understood, laughing at me, and saying that I am mad or joking.

We, the Pleiadians, are beings of love, peace, and light. No matter what, we are here to protect humanity, and be aware of human being's state. A lot of pain and illness is between our legacy, and we try and hope that one day it will be released from the Earth. We know how difficult is to be in a human body and live a life in 3D on the Planet Earth. That's why we are here, in this moment of the present, with all of you. Be patient and the light will come at the end of the tunnel.

*How dare you think that you are alone in this process of evolution, you have never been alone. What about your guardians' angels and the rest of the beings that are supporting you and guiding you through this stage of your life? We are a fully equipped team that is looking over your shoulder and whispering to you each step that you must take.*

It's time that you must be aware of this situation, of this reality, that surrounds you, but you can't see it. What beautiful beings you are, so powerful and gifted but so deep in sleep. And so on, I can say many things about your state of dormant, but my goal is to wake you up. Every day is a present that needs your attention. Could be it possible to open a present and don't care about what it's inside? This is you, who doesn't care so much about the life you have, that you are alive and breathe the oxygen of Gaia.

How unconscious you are that the time you have on Earth is priceless. If you knew that, you would be in heaven of happiness, but you are not. The realm of happiness is your kingdom, and you are not aware of that, as well. So nasty

meanings of self-destruction are flying around you and penetrate your soul wisdom. You don't care at all; it is like when you know that outside of your house is a big contamination and you open the doors and windows without caring so much. This is called auto destruction. No more pain and illness in your life, be aware of what happened to you and don't let the dark in your soul to enslave you.

My goal is to awaken humanity and bring joy and happiness to your souls, your houses, and your families. Many of us, the Pleiadians, are involved in this process of human evolution to protect you, not to fall into the darkest hole that you are digging by yourself. Be aware of your state of consciousness, be aware of your state of spirituality. Be you.

*We, the Pleiadians, are fully equipped with the tools that we implement during our sessions of cleansing of human DNA. It is so true that out of Planet Earth, our spaceships are stationed and ready to proceed when it will be necessary to protect humanity. It is not a legend - it is the truth that we want you to know about.*

Don't be afraid, when we say ready to proceed to protect humanity, as we stated before, we are here to help you and take care of you as our beloved children. Don't panic about the chaos that the Planet Earth are right now in. The chaos is a vibration of fear and must be removed as promptly as possible. Don't be afraid, just find the peace that you are, in your soul, in your heart. You

know, how important are children to their parents, so we are the same as your parents who want to protect you and give you the best chance to evolve.

So many people from Earth are already in contact with us, in spiritual contact through our consciousness. Don't be afraid of the changes which are near to come, these changes are meant to be for a bigger picture of humanity that is described in the Bible.

The Earth Planet is now experiencing a huge energy field that comes from Cosmos, to help humanity to proceed to the next level of evolution. No worries left, everything is developing as was written in the sacred stones, the real bible that humanity can trust.

Perhaps, the truth is hidden so well from you, that to reveal big events is a hard job for us. We know how difficult must be to live in a total lie. Hold your hands and all together we can reveal the truth, who you are as humans.

Consciousness is a great state of mind that allows us to connect as spiritual beings. Without consciousness our souls are nude. Perhaps we know each other from other realms of Cosmos, and we agreed to help each other in this moment of this age. No more tears and worries left, we know exactly how disappointed and helpless you are, and that's why we are here for humanity, for our brothers and sisters, and our divine legacy.

*So, probably, you think you are alone in this battle, but it is not true, as many hidden facts, and this is one of them. Probably, you don't know that Planet Earth is the focus number one in the Milky Way Galaxy.*

The Galactic Federation is working hard to destroy the pyramid of the devil's soul. The Galactic Federation is an organization that protects planets in need of help, and Planet Earth is first on the list, so bad and so dark is right now. The good news is that we are here with a good plan to follow. Eventually, the help is sent from different parts of our galaxy. No part of the Earth is left without a divine plan to transcend the senses of humanity and accept the war. The war of truth and loyalty to our endlessness God. The prayers have been listened to and considered.

So vast is the ocean of betrayal and agony that God can't wait any more. The layers of forgiveness and the wounds of his children are now exposed to heal.

*The healing, by the way, is a program to develop instant patterns of crystals that penetrate humans' bodies to erase the malfunction of cells. This program is called EE System and is already in use on Planet Earth.*

The God is powerful, the God is our legacy to the inner world and outer world. Everything is powerful when it comes from God, and this project has its harvest. We, as a whole, are powerful, our bodies as Pleadians are vulnerable, so the disaster of unconsciousness is affecting us as well. We are the humans that already left the density of the second dimension and transcended to the next level of consciousness. We know exactly how a human body needs to be healed and we are here, in this present of the Earth to help you. So far, so narrow the emblematic history of the Earth is pursued by us.

How far do we go with our consciousness to accelerate the beginning of a new age on our Planet Earth? We, the Pleadians, are here in this moment to accelerate the performance of new patrons and be part of the change that humanity needs. We know exactly how to abstain from the benign fortune of danger. So far, so narrow is the actual state of Earth of belonging to the darkest side of humanity.

How many people know the importance of being betrayed, it's so difficult to listen to the Creator, the God, or how you name it. Betraying is the pick of the iceberg in an ocean full of ice. How can you dare to question the nature of God, all of us are part of it, can you believe it?

The son and the father are at war because of so dumping and unconscious reality is presented now on Earth. Can you, please, understand the meaning of being isolated by your father because of your malfunction reason of disappointing the best known of all the ages, the Creator?

Please you, beg you, wake up humanity! No time to sleep any more. Take action and stand for the truth, for the divine legacy between you and the father. No time to waste, being unveiled is the best you can experience in this moment, in this present.

So far, so nasty is the truth of ambiguity, the truth of all the times, the truth of all of us. No time to waste, no time to look back and suffer for something that already happened and do not have power in your present. Only if you give the power to your past, it will chase you. Stop thinking about the past that is

already gone and makes you feel unstable. Give space to new things and events, new people, and friends to fill your empty gaps.

Don't isolate yourself for a long time, contact with others is vital for your mental health. Promoting good values to your community will make you a better person. Help who needs help. In this way, you become one with the whole. Prosperity is knocking on your door if you let yourself flow. So simple is all of that.

Why do you think that life is difficult? The more you think about your life and the obstacles that are present, the more is likely to manifest them in your life. Why not think about how to make a better place on Planet Earth, starting with your community.

*Also is vital to understand the nature of the Universe, and how it works in your favour. The Universe is your ally forever if you permit it to be. We also call the Universe, the Aladdin. Exactly as in the fairytale, the Aladdin makes reality your dreams and your orders. A slight difference between Aladdin from fairy tales and the Universe is that you can ask for unlimited times and still works.*

So true is all the information I give you, try to find your way, your dream to become a better person and embrace the Universe. Our goal in telling all of this is to make you aware of how powerful you are as a soul, a human. You see yourself, as a tiny thing on a planet and that is not true. You are part of this Planet, of this Universe and each of us is a piece of puzzle. Make a big step in your life and open the doors of your heart, let the angels help you and be

brave all the time. When you think you need help, just ask for it, there is an army that is ready to do so, they just need your permission.

Imagine yourself in a desert, where is very difficult to find water and nature to shade your body, still there are a lot of options to survive. Now, compare it with where you at this moment are. Do you see the abundance of the Planet Earth? Say thank you for everything you have, that keeps you alive, for everything that makes you feel good.

*Being thankful for what you have already is a secret to prosperity. The Universe gives you more of what you are aligned with. So simple is that.*

Now that you know how the Universe works, be aware of your thoughts. Choose correctly what you want to manifest in your present and use the Aladdin for building your empire. So simple is that. Be one of the warriors who change the world, who speak the truth out loud and care for those who need it. Be you.

So fast and so vast the words of our Creator are here to be listened to. Take a moment and find out who creates the rules on Planet Earth. Is it an organization that works for the good sake of people? Is it a community that cares about you, the humans? Who is there ruling the world? You don't know and don't care. How can be a person so ignorant, so asleep and don't see anything that is happening around him?
