

Little Icy

Sunshines on top of the mountain
lick, polish the coolly glacier
while funny clouds complain for rain.
But some low heat displays fancier
and hits harder this meek domain ;
thus kind icy flows run bouncier
than congested cars in the plain.

A plane shows up in the picture
during the lazy trip of it,
takes photos in a warm gesture
as the blue-and-white stuff does split.
A long river shows, running down,
while the drying mount seems to frown.

White glacier's melting on its own -
passengers dream of lands more snowed.
