

Elements

Fire

Bright flames help us see.
They can provide warmth to some
But they burn others.

Earth

Stone walls keep us safe.
They create order for some.
But wars for others.

Water

Rivers give us life.
They quench thirsts of some
But they drown others.

Wind

Breezes give us strength.
They power the sails of some
But tear through others.

Elements

Earth, Fire, Wind, and Air
Cause happiness and despair.
Even darkness brings light.
